### Chairman's Comments

There are some critical comments made by the external evaluator which are very useful for the improvement of the department. Few of the suggestion have already been worked upon with some likely to be completed in the near future. Some of the recommendations require active input from administration like ORIC, B&W, P&S and Registrar offices UoC but we hope that all of these will be addressed before the next PEC visit. Meanwhile as chairman of the department of Electronics Engineering, I would like to thank Dr Sajid (add. director QEC) and his team for this great and fruitful effort.

Name and Signature

Dr. MOHSIN TARAR
